ABOUT ME

MERN Stack Developer

A passionate **MERN Stack Developer** with expertise in JavaScript, React.js, MongoDB, Node.js, and Express. Holds a **Bachelor of Computer Applications (BCA)** from the University of Calicut, with a portfolio of over 30 mini projects and two major projects, showcasing comprehensive full-stack development skills and innovative problem-solving abilities. Specializes in developing robust RESTful APIs, implementing JWT-based authentication, and managing state using Redux and Redux Toolkit. Dedicated to continuous learning and staying updated with the latest trends in web development. Eager to collaborate on challenging projects that foster creativity and drive innovation.

TECHNICAL SKILLS

Languages : JavaScript, HTML, CSS, C++, TypeScript

Back-end : Node, Express, MongoDB, Socket.IO, Jwt ,Mongoose ,Multer

Front-end : React.js, Next.js redux, redux-toolkit, tailwind-css , Daisy ui ,Bootstrap , React Router , Babel , Socket.IO Client , AntDesign ,Handlebars ,Axios ,Chart.js ,React Hook For

Tools Git, Postman, Figma, Nginx , Aws, Eslint,swagger

PROJECTS

Chat-Hive

<https://chathivemedia.vercel.app/>

Full-Stack Social Media Application with Admin Panel

- **Description:** A dynamic social media platform built using the **MERN stack** (MongoDB, Express, React, Node.js) following the **MVC architecture**. The platform features secure user authentication via **JWT (JSON Web Token)** and supports role-based access for admins and users. Users can engage in **real-time messaging** with **Socket.IO**, post feeds, share stories, write blogs, and interact through comments and likes. Additionally, users have the ability to **report** inappropriate content or users and **hide** posts they do not wish to see. Admins have full control to manage users, posts, reports, and notifications. The website is fully responsive thanks to **Tailwind CSS**, and **ESLint** ensures high code quality and consistency throughout the project.
- **Technologies Used:** MongoDB, Express, React, Node.js, JWT, Socket.IO, Tailwind CSS, ESLint
- **Key Features:**
 - * Role-based authentication with JWT for secure access control
 - * Real-time messaging using Socket.IO
 - * Users can post feeds, stories, blogs, with interactive features like comments and likes
 - * **Content Moderation:**
 - Report Functionality: Users can report inappropriate posts or users for review.
 - Hide Functionality: Users can hide posts they prefer not to see in their feed.
 - Admin Management: Admins can view, review, and act upon reported content and manage hidden posts and users.
 - * Admin panel for managing users, posts, reports, and notifications
 - * Responsive design with Tailwind CSS
 - * Clean and maintainable code using ESLint for code quality
- **Frontend:** <https://github.com/MuhammedFahizk/Social-Media-Frontend>
- **Backend:** <https://github.com/MuhammedFahizk/Social-Media-Application-Server>

Drive Wave - Car Rental Node.js, Express, MongoDB, Handlebars, Git <https://github.com/fahiz-mavoor/drive-Wave>

- Developed a comprehensive car rental application using the MERN stack, featuring a dynamic frontend built with React and **Handlebars (HBS)** for templating. The application is hosted on an **AWS EC2** instance, served through **Nginx** as a reverse proxy, and managed with **Route 53** for DNS routing, all while following the **MVC** architecture to ensure a clean and maintainable codebase.
- Implemented various roles allowing users to browse and book cars, vendors to manage their listings, and administrators to oversee the system. Integrated **Razorpay** for secure payment processing and **Nodemailer** for automated email notifications.
- Managed file uploads with **Multer**, stored images in **Cloudinary**, and enhanced user experience with **Flatpicker** for intuitive date selection. Created reusable UI components with Handlebars partials to maintain consistency across the application.

Personal Portfolio Website React, Tailwind CSS, Ant Design <https://github.com/fahiz-mavoor/Personel-Portfolio-React>

- Developed a responsive and interactive personal portfolio website from scratch using **React**, incorporating **Tailwind CSS** for design, **Ant Design** for UI components, and **Vite** for fast builds.
- Enhanced the site with dynamic effects from **Framer Motion** and **AOS**, implemented efficient form handling with **react-hook-form**, and seamless navigation with **react-router-dom**.
- Improved user experience with dark mode via **react-toggle-dark-mode**, animated text effects with **react-type-animation**, and featured projects using **react-multi-carousel**. The website is deployed on **Vercel** and maintained high code quality with **ESLint** and **Prettier**.

EXPERIENCE

SelfStack

MERN Stack Developer Intern

August 2023 – Present
Kozhikode, Kerala

- Worked on over 30 mini projects and one major project, specializing in full-stack development. **Mongo Db, Express, Node, React**
- Applied skills in JavaScript, React.js, MongoDB, Node.js, and Express
- Developed robust RESTful APIs, implemented JWT authentication, and managed state with Redux and Redux Toolkit. and speed through optimization techniques by
- Ensured code quality with ESLint, created reusable UI components, and incorporated intuitive user interfaces.
